How to become a member

MISSION STATEMENT

We are dedicated to promoting, developing and protecting the interests of the manufacture, trading and marketing of all outdoor fabric products with exceptional quality and to recognised standards, both nationally and internationally.

WHAT IS OFPANZ?

OFPANZ as an Association promotes a high standard of professionalism, business ethics and workmanship for the Industry.

Our members are our strength and our purpose.

Members of the Outdoor Fabric Products Association of New Zealand (OFPANZ) are fabricators, suppliers, installers, consultants and training organisations. Together they support the industrial textile fabric industry, provide product and services worldwide and are recognised for quality, technique and design.

By working together as members, cooperating and collaborating with our business partners as well as various Government Departments, the Motor Industry Training Organisation and other associations we are able to remain relevant while continuing to represent the Industrial Textiles industry.

We work together to advance our businesses and our industry. When you join, we will connect you with a current member to help introduce you to the industry.

MEMBER TESTIMONIALS

"The annual conference is an absolute must do. Every year we come away with measurable benefits that exceed the cost of attendance. At the last conference we learned from another member of a good source for a particular product that we buy a lot of. It turned out they had a comparable product but were much cheaper, saving us \$500 a month. A year later, that "casual conversation at the conference has saved us over \$5,000."

MIKE ALSWEILER,
DAVE GIDDENS SAILMAKERS

"Baytex has been a member of OFPANZ since its inception. Being a part of this organisation and attending conferences, Baytex has managed to establish good supplier relationships very quickly with all potential suppliers and their new innovative products, all in one place. Networking among our peers, or at the regularly held regional meetings, has offered us interesting collaborative opportunities. The conference awards present to our peers how creative and innovate you can be as a business in the fabric industry."

ANDREW LINGMAN,
OPERATIONS MANAGER - BAYTEX
